

Online Internal Assessment Test during the COVID-19 pandemic

“Academic evaluation of students is a very important milestone in any education system. The performance in tests and examinations gives confidence and satisfaction to the students which reflects competence, performance, and credibility that is necessary for global acceptability.”

During COVID-19 pandemic, the Institution promptly shifted evaluation and assessment to online mode that was different from the regular offline mode used prior to the emergence of the coronavirus. Performing online tests required necessary steps in providing students with accurate Internal Assessment Marks for which a Technical Committee was formed. The committee selected suitable online platform to conduct the tests, explained about creation of virtual platform for uploading question papers, administering evaluation process and scoring the test results to the faculty. Similarly, students were also informed about uploading written answer scripts.

Challenges in conducting the Online Tests: -

- Knowledge in accessing the ICT enabled platforms for conducting the Internal assessment test.
- Conducting online exams made it difficult to track students who were staying in remote places and without proper network facility.
- Monitoring the students online during the commencement of Internal exams.
- To ensure that all students abide to online rules and regulations set by the examination and technical committees.
- It was difficult to detect fraudulent activity during exams.

- To ensure students have a strong enough internet connection to take part in the online exams, and that the time zone of each student had to be taken into account during the process.
- Allow students to answer questions without the internet and uploading them once a device reconnects within time allotted to submit the answer scripts.

All the above challenges were considered and proper guidance was given to the students to attend Online examinations.

The Institution took the following steps to conduct online tests smoothly-

- Licensed Zoom platform was used to conduct online test.
- Google classroom was created for each class. Question papers were uploaded and students were instructed to submit the same within a stipulated time.
- The Class teacher, with assistance by the Manager, was in continuous touch with the students to help students, in case of technical issues
- Faculty evaluated the answer scripts with the help of Kami app and stylus pen.
- Marks of evaluated online scripts were uploaded in the respective Google Classrooms.
- Discrepancy in marks was resolved by the respective teachers immediately during the online classes.

- **Interface of Google classroom access to the students and Faculty members**

- **Providing instruction to the students about online exams in Zoom application**

Online test time table
